

## Integrate 201 - Intermediate Level

# Intermediate Technology Integration for Teachers

The Integrate 201 series takes technology training to the next level, both in more advanced skills and in-depth technology integration supporting the learning in the classroom. Teachers acquire the ability to work with mail merge in word processing, more advanced features for configuring databases and spreadsheets, the more powerful linking aspects of presentation graphics, and how to use the Internet to build world communities in the classroom. They then develop a lesson plan and/or thematic unit incorporating technology with integrated curriculum in more dynamic ways to support classroom learning.

### Assessments Included:

- Integrate Diagnostic Assessment
- Integrate Post-Assessment
- Portfolio Assessment

Delivery Mode	Platform	Software	Length
Instructor-Led	PC	Office97, Office2000	5 days/35 hours
Instructor-Led	Mac	Appleworks 5.0/ClarisWorks 4.0	5 days/35 hours

### Integrate 201 Includes:

**Day 1: Project-Based Learning and Technology in the Classroom**

**Day 1: Enhancing the Writing Process with Word Processing for All Curricular Areas**

**Day 2: Enhancing Critical Thinking with Spreadsheets for All Curricular Areas: Collecting, Calculating and Reporting Information**

**Day 3: Enhancing Critical Thinking with Databases: Organizing, Analyzing and Reporting Information**

**Day 4: Enhancing Presentations with Electronic Presentation Software for Project-Based Learning**

**Day 5: Enhancing Classroom Instruction with Technology**
