

Integrate 220 - Intermediate Level

Building Classroom WebQuests and Web Pages

Web production for the classroom provides solutions for teaching, learning, and incorporating Web-based design tools in the classroom. Integrate 220 delves deeply into the theoretical uses of the Internet in the classroom including Internet Ethics as they relate to educators, the growing role of Distance Learning, and Online Collaboration. Educators will explore methods of Web page design through dialogue, demonstration and hands-on activities, so they can use this technology to augment their lesson plans and learning objectives via the Web.

Assessments Included

- Integrate Diagnostic Assessment
- Integrate Post-Assessment
- Portfolio Assessment

| Delivery Mode | Platform | Software | Length |
|----------------|----------|----------------------------|-----------------|
| Instructor-Led | PC | Netscape/Internet Explorer | 2 days/14 hours |

Part 1: Internet Ethics, Distance Learning and Online Collaboration in the Classroom

- Exploring Internet ethics, copyright laws, and the roles and responsibilities of educators.
- Demonstration and discussion of Distance Learning, its technical requirements, modes of delivery, choosing the right mode for you.
